PROFESSIONAL SUMMARY

Offensive security professional with 6+ years of specialized experience in penetration testing and red teaming. Currently serving as a Red Team Consultant at Hacktilizer Cybersecurity Consulting, I bring hands-on expertise across Active Directory security, and web, API, and mobile (Android/iOS) application testing. My career spans diverse sectors, including banking, NGOs, and boutique cybersecurity consultancies, giving me a broad perspective on real-world attack surfaces. I hold a solid track record of practical offensive security certifications and stay hands-on with SIEM and blue-team triage to understand both attack and defense strategies. I am the holder of 10+ industry-recognized offensive security certifications, including HTB CPTS, ASCP, ACP, CASA, CRT0, CRTP, HTB CJCA, CRTsv2, MCRTA, and CMPen.

TECHNICAL SKILLS

- Penetration Testing: Web App, Network, Mobile (Android/iOS), API, Active Directory, Thick Client, Cloud (Multi-Cloud)
- Red Team Tools: Cobalt Strike, Certipy, BloodHound/SharpHound, Impacket, Rubeus, Mimikatz, CrackMapExec, Metasploit
- Web & API Testing: Burp Suite Pro, OWASP Top 10, SAST/DAST, API Security
- AD Attack Techniques: Kerberoasting, Pass-the-Hash, DCSync, ADCS Abuse (ESC1-ESC8), Golden/Silver Ticket, AS-REP Roasting
- Vulnerability Management: Tenable.io, Nessus Pro, Rapid7, Qualys, ZAP, OWASP tools
- Source Code Review: Python, Bash; Manual SAST
- SIEM / Blue Team: Elastic Stack (ELK), TrendMicro, Palo Alto (SOC Fundamentals)
- Frameworks & Standards: MITRE ATT&CK, OWASP, PTES, PCI DSS, ISO/IEC 27001, CVSS Scoring
- Operating Systems: Kali Linux, Parrot OS, Ubuntu, Windows Server, macOS
- Reporting: Executive summaries, technical vulnerability reports, CVSS scoring, CVE analysis, stakeholder remediation communication

PROFESSIONAL EXPERIENCE

Red Team Consultant | Hacktilizer Cybersecurity Consulting · Full-time

Dec 2025 – Present

- Delivered 10+ client penetration testing engagements across diverse sectors including Food & Beverage, Delivery Services, and Education, tailoring methodologies to each industry's unique risk profile and compliance requirements.
- Conducted comprehensive security assessments spanning Web, API, Android, and iOS platforms, ensuring full-spectrum coverage across client digital ecosystems.
- Performed assessments using both Black-box and Grey-box testing methodologies, adapting approach based on client requirements, threat modeling, and available access levels to maximize test coverage and realism.
- Identified and validated 40+ critical-severity vulnerabilities across multiple client sectors, providing precise risk prioritization and actionable remediation guidance to mitigate high-impact business risks.
- Verified exploitability of identified vulnerabilities through hands-on validation, accurately assessing real-world business impact and eliminating false positives to support precise risk prioritization.
- Authored professional-grade technical reports featuring detailed Proof-of-Concept (POC) documentation and clear technical explanations, elevating report quality beyond standard findings summaries to support faster client remediation.
- Maintained direct client communication throughout the engagement lifecycle, coordinating vulnerability resolution and confirmation with vendor teams to ensure closed-loop remediation.
- Contributed validated, vendor-confirmed findings to published security research blogs, sharing real-world vulnerability insights with the broader security community following responsible disclosure and resolution.

Cyber Security Specialist | AYA Bank · Full-time

Aug 2023 – Mar 2024

- Delivered 40+ comprehensive penetration tests focusing heavily on high-risk Web applications and Android APKs alongside annual assessments and major-change projects, ensuring robust security across digital platforms.
- Contributed as a core member of advanced Red Team engagements, successfully identifying critical flaws and translating complex technical findings into practical remediation actions for stakeholders.
- Executed comprehensive security assessments including Vulnerability Assessments, Internal Penetration Testing, and Web/API/Android application testing across Black-box, Grey-box, and White-box methodologies to proactively identify system risks.
- Discovered and validated critical exploits to accurately measure severity and real-world business impact, ensuring precise risk prioritization and zero false positives.
- Authored detailed technical and executive reports mapping out vulnerability exploitation methods and strategic remediation steps, effectively translating complex security findings for both technical teams and stakeholders.
- Led compliance-driven security reviews, specifically conducting PCI-DSS assessments to ensure client networks and data-handling applications met strict regulatory standards.

- Facilitated Purple Teaming exercises and closely coordinated with the SOC team to enhance incident response capabilities, optimize detection rules, and bridge the gap between offensive and defensive security.

Security Analyst | ONOW Myanmar · Full-time

Jul 2022 – Aug 2023

- Strengthened organizational security posture by designing and executing Security Awareness programs and simulated Phishing Testing campaigns, significantly reducing human-error risks.
- Conducted advanced Penetration Testing across Cloud infrastructure and Web applications to identify, validate, and mitigate critical security gaps before deployment.
- Developed and implemented robust security policies and procedures, aligning internal operations with industry frameworks and compliance standards to ensure continuous data protection.
- Proactively monitored emerging threats, attacks, and vulnerabilities using SIEM and security tools, ensuring rapid detection, analysis, and effective incident response.

Instructor | Lat Twae Space · Part-time

Nov 2022 – May 2023

- Cybersecurity training
- Linux Training

Lecturer & Penetration Tester | M.S.T University · Full-time

Jan 2020 – Jul 2022

- Delivered comprehensive ITPEC training to students, breaking down complex computer science fundamentals and system analysis concepts into actionable learning modules.
- Instructed and mentored students on advanced Certified Ethical Hacker (CEH) concepts, guiding them through theoretical frameworks and hands-on lab practicals to develop real-world hacking skills.
- Designed and supervised hands-on Networking and Microsoft Windows Server labs, enabling students to successfully configure Cisco devices and manage enterprise server environments.
- Led practical sessions on Software & Hardware Troubleshooting and enterprise-grade Network Installation, equipping students with essential technical field skills.
- Conducted authorized Penetration Testing and Security Assessments on client-requested environments and assets, identifying critical vulnerabilities and delivering actionable remediation insights to safeguard sensitive information.

FREELANCE & BUG BOUNTY EXPERIENCE

Bug Bounty Hunter & Freelance Pentester | Bugcrowd, HackerOne

Sep 2021 – Present

- Discovered and responsibly disclosed vulnerabilities across web, API, mobile, and network attack surfaces
- Recognized by Google, Binance, Proton, Tecno, Dell, NASA, U.S. DoD, DHS, DoL, DoED, NARA, Singapore GovTech, SANS, EC-Council, TrendMicro, and IBM

EDUCATION

B.Sc (Hons) Cyber Security and Networking | University of Central Lancashire (UCLan), UK

Mar 2022 – Feb 2023

Higher National Diploma – Computer Science (SQA, UK) | M.S.T College, Yangon

2017 – 2019

PROFESSIONAL CERTIFICATIONS

- HTB Certified Penetration Testing Specialist (CPTS) – HackTheBox (Aug 2026)
- HTB Certified Junior Cybersecurity Associate (CJCA) – HackTheBox (Jul 2026)
- Certified Red Team Operator (CRTO) – Zeropoint Security (May 2026)
- Certified API Security Analyst (CASA) – APIsec University (Apr 2026)
- API Security Certified Professional (ASCP) – APIsec University (Dec 2025)
- APISEC Certified Practitioner (ACP) – APIsec University (Dec 2025)
- Certified Red Team Specialist v2 (CRTSv2) – CyberWarFare Labs (Aug 2025)
- Certified Red Team Analyst (CRTA) – CyberWarFare Labs (Dec 2024)
- Certified Red Team Professional (CRTP) – Altered Security (Nov 2024, expires Nov 2027)
- Multi-Cloud Red Team Analyst (MCRTA) – CyberWarFare Labs (Jun 2024)
- Certified Mobile Penetration Tester – Android (CMPen) – The SecOps Group (Jun 2024)
